PROJECTS AND GITHUB

GitHub

<https://github.com/parisdiaz19>

More projects are hosted on my profile/portfolio

Weather Application (HTML5, CSS3, JavaScript, API/Fetch)

<https://parisdiaz19.github.io/WeatherApp.io/>

This application allows the user to enter a location and retrieve data from the AccuWeather API. The UI is updated dynamically with DOM manipulation.

Maki House Restaurant (HTML5, CSS3, JavaScript)

<https://parisdiaz19.github.io/MakiHouse.io/index.html>

This is a sample restaurant website based on material design. It features a contact form and a menu.

Video Game Finder (HTML5, CSS3, MaterializeCSS, JavaScript, API/Fetch)

<https://parisdiaz19.github.io/gameLibrary/>

This application allows the user to look up any video game from an API database. The game is then displayed dynamically and shows detailed information regarding the game. The DOM is manipulated to output the data.

Travel Agency Website (HTML5, CSS3, MaterializeCSS, JavaScript)

<https://parisdiaz19.github.io/TravelLand.io>

This is a sample travel agency website using a CSS framework. It features a contact form and a grid system.
