FRAMEWORKS/LIBRARIES: Bootstrap/Materialize, React, jQuery
TOOLS: Bash, Git/ GitHub, Chrome DevTools, Version Control

SUMMARY

From the moment I created my first fully functional website for my music teaching business, I knew I was hooked into the world of web development. However, web development has never been "just a job" for me. It offers an engaging challenge to continually learn and improve my skills in creating high-quality websites/applications. What started with a simple website to promote my business has become a full-fledged passion that only gets more exciting as each day passes.

PROJECTS

Portfolio (Link)

This is my personal portfolio website that showcases all of my projects/skills. It was made from scratch using HTML, CSS, and JavaScript.

Personal Musician Website (Link)

This is my music business website used to promote my private violin lessons. It was made using HTML, CSS, and JavaScript.

Pokédex (Link)

Based from the classic Pokémon game, this application was designed with vanilla JavaScript code. It manipulates DOM elements to output the app with specific information about each Pokémon from the PokéAPI database. Fetching the data was used with promises and asynchronous code.

Breakout Game (Link)

This game was created using plain HTML, CSS, and JavaScript. The application is output onto an HTML canvas element using DOM elements.

Sushi Restaurant Website (Link)

This is a page for a local sushi restaurant in my area. I remade the website using HTML and Materialize CSS to allow responsive layouts for tablets/smartphones.

EMPLOYMENT

Purpose White - Fort Lee, NJ   January 2020 - Current
Front-End Developer
- Design company website using HTML, CSS, JavaScript, Shopify.
- Discuss product and prototypes with CEO, CFO and CMO.

Swish Gadgets - Fort Lee, NJ   January 2019 - December 2019
